Summary

Junior Front-end Developer experienced in *HTML, CSS, JavaScript, React.JS* programming. Skilled in developing and maintaining responsive web applications, improving user experiences, and debugging and solving issues.

Work Experience

Web Developer | Database Administrator
Sancos
September 2023 - May 2025

- Implemented key web features including a secure password reset page, a medical staff portal with daily and monthly schedule views, and a patient self-service appointment booking system — resulting in a 40% increase in patient self-service usage and a 25% reduction in administrative workload.
- Acted as a database administrator, developing and optimizing reports and configuring their visual representation in the GUI — which improved report clarity and reduced manual processing time by 30%.
- Developed and optimized database jobs and stored procedures, improving system performance and scalability — achieving a 20% faster response time during peak usage.
- Designed and customized document templates and visual report layouts in the DoctorEleks medical information system, improving documentation accuracy and standardization, and reducing formatting errors by 35%.

Projects

1. Pizza Slice
Live website | Source code
